

## ENVIRONMENTAL- AND ENERGY POLICY

Main profile of our firm: **producing, decoration and assembly of plastic components, producing and distribution of electronic parts**. Basic technologies: moulding, decoration and assembly of plastic components, **producing of electronic parts**. Our company targeted to continue activities by taking into consideration environmental and energetic issues. Environmental and energetic way of thinking and operation is one of the important element of the company's basic philosophy.

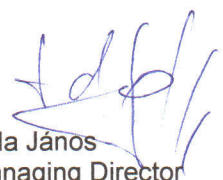

Operating integrated the Environment Management System to ISO 14001:2015 and the Energy Management System to ISO 50001:2011 standard of our firm is tightly harmonised with our company's Quality Management System.

Our aim is to reach such environmental performance and energy efficiency, that we can proud of, furthermore to widely gain our partner's and people's of interest trust, to be good neighbours and to contribute to sustainable development.

### In order to reach our goals:

- We committed ourselves to prevent environmental pollution and intend to decrease emissions continuously.
- We keep to lawful environmental protection and energetic regulations, rules and standard requirements, and internal regulations, referring to our activities.
- We have defined goals and provisions, to be realised within programmes, having monitored their realisation continuously. We ensure necessary information and resources to reach our aims.
- During our activities within officeworks as well, our primary goal is to keep in low level the risks of harmful environmental effects, to reduce quantity of waste being arised to select, forward and possibly recycle waste material.
- Energy and materials are used in economical way during our activities, we have been optimizing our energyperformance continuously.
- We have been making a break continuously for to optimize the energy efficiency of machines, technologies during maintenance, modernization. We pay special attention to energyefficiency during purchasing and developments.
- Our environmental performances and energy consumption are evaluated regulary, our management systems is continuously developed taking consideration this evaluation.
- Our colleagues are regulary informed about performances and changes of our Environment- and Energy Management System and we have brandnew information.
- Our suppliers are required to act according to demands of our Environment- and Energy Management System, properly the legislation. We look positively at our subcontractors, who identify with our environment and energy efficient point of view. We prefer our subcontractors, who can certify the commitment in this direction with an independent certifikate.
- Our company highly emphasise on succeeding environment protection approach, spreading environment-centred way of thinking among colleagues and suppliers in order to fulfil requirements in higher level.
- Our colleagues are demanded to complete environment-conscious and energy efficient work, they regular trainings as support for that.
- We pursue to prevent, protect emergency situations during our activities.
- As important element of our environmental- and energy policy we take care of human health.
